

Title :

Cyber Crime in Kuwait

Police Teaching and Training perspective

Abstract :

This study demonstrates a Kuwaiti training approach in the cyber crime management field. In a first step, a general introduction of the Cyber Crime in Kuwait should be carried on to amplify the meaning of this notion locally. In a second step, different police officers teaching and training methods , courses and Softwares will be explained. As a conclusion, this study will try to summarize any future solutions demanded by this approach since the nature of this field is developed and interchangeable constantly.
